Subject: **CRITERIA FOR FOUNDATIONS FOR MEMORIALS**

To Whom It May Concern:

Recently there has been a number of memorial foundations affected by the cold weather this past winter. Many of the memorials have sunk and the foundations re-done. This has caused great concern to relatives with love ones buried in our cemetery. ***Therefore effective immediately all memorials installed in the cemeteries at St. Joseph on the Brandywine must meet at minimum the following criteria:***

- They must be at least 36 inches deep to meet frost line criteria in Delaware
- They must be flared at the bottom to ensure stability.
- Vendors must state on the application that they intend to meet these criteria.

Applications can be emailed to rspittleofsjob@comcast.net for prompt review and disposition. Any questions please use the e-mail address above.
